STARTER KIT FOR CHATGPT PLUGINS

What are the ChatGPT plugins?

Think of ChatGPT plugins like Chrome extensions. They're not made by OpenAI but by third parties, and **they can add cool new features to your ChatGPT experience.**
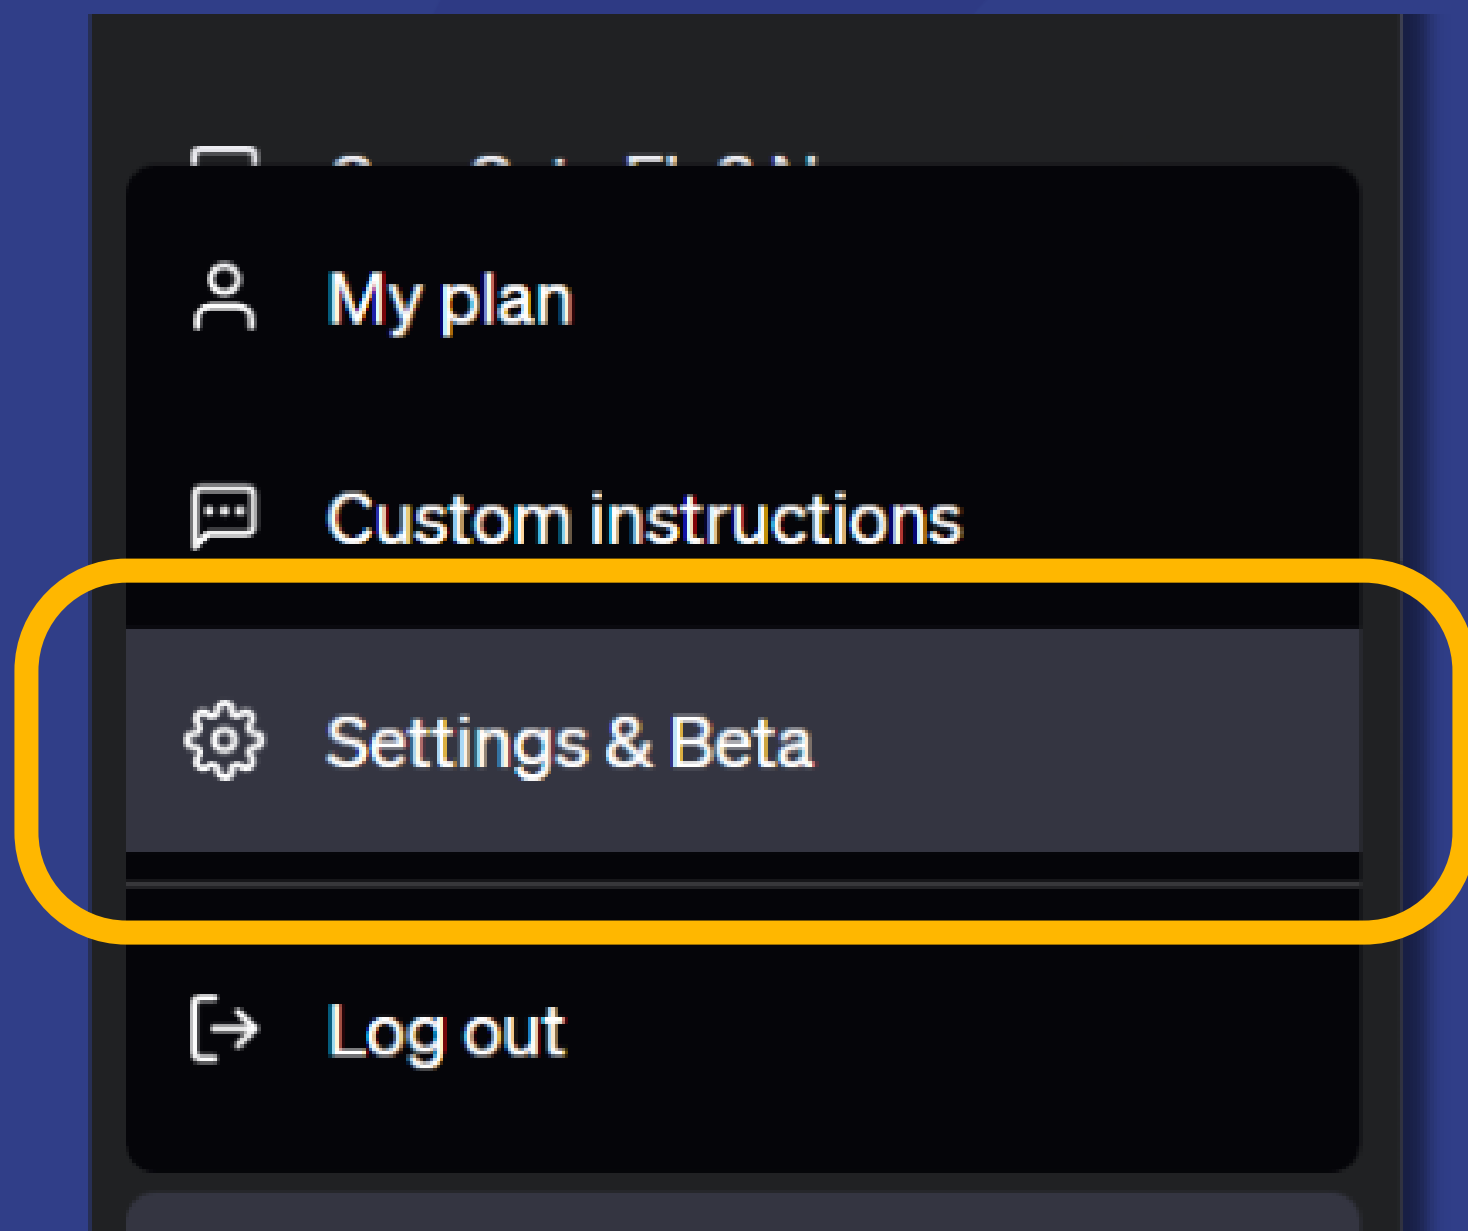

What cool functions?

- Access the web and start a search with a chat
- Upload a pdf and ask anything
- Find valuable market information
- Create charts and graphs
- Get extra support in writing
- And you can use plugins to find more cool plugins :)

Great - but how can I do that?

The plugins are currently only available with a ChatGPT subscription (20 USD/month).

After the registration, you can access the settings in the bottom left corner (desktop version):

Within the Beta features, **turn on the "Plugins".**

Settings   ✕

⚙ General

🧪 Beta features

🗄 Data controls

As a Plus user, enjoy early access to experimental new features, which may change during development.

Plugins

Try a version of ChatGPT that knows when and how to use third-party plugins that you enable.

Advanced data analysis

Try a version of ChatGPT that knows how to write and execute python code, and can work with file uploads. Try asking for help with data analysis, image conversions, or editing a code file. Note: files will not persist beyond a single session.

Then, in the middle, click on "GPT-4" and **choose the "Plugins".**

No plugin is shown by default, you have to select them **from the Plugin Store.** You can choose a **total of 3 plugins** for one chat conversation, but you can vary the plugins when starting a chat.

The Plugin Store can be accessed from the "Plugin" function. Installing them is simple, click on the desired tool and in most cases the extended functionality will be available after a few seconds (some plugins require registration on the developer's site).

The plugin you want **to use must be checked in** the list.

Here is a tiny snippet from the Plugin Store. Browse through the descriptions or search for **"There is an AI for that"** plugin and ask it for advice. :)

GY Summarize the highlights from this article: https://www.visier.com/blog/hr-leaders-need-to-know-about-generative-ai/

T Used **Access Link** ⌄

The article from Visier discusses the transformative potential of generative AI in the field of Human Resources (HR). Here are the key highlights:

What is Generative AI?

Generative AI refers to AI models that can generate new content like text, images, music, or video. Unlike traditional AI, which is limited to recognizing or classifying existing data, generative AI can create new data by making inferences and connections. This makes it a disruptive technology, capable of tasks that were previously considered uniquely human.

Impact on HR

Generative AI has the potential to close the "people impact gap" in HR, which is a combination of data gaps, language gaps, cultural gaps, and pace and tempo gaps. It can bring about a fundamental change in HR roles and operating models.

Six Ways Generative AI Will Help HR

1. **Recruitment and Candidate Screening**: Automate and enhance the recruitment process by

Here are three detailed articles on the topic of challenges faced by Talent Acquisition leaders and the role of AI:

1. AI: Revolutionizing Talent Discovery

- **Link**: AI: Revolutionizing Talent Discovery
- **Summary**:
  This article delves into how AI is transforming the recruitment landscape by automating tasks and mitigating biases. It emphasizes the role of AI in enhancing diversity and inclusion in the workforce. The article also discusses real-world case studies that showcase the effectiveness of AI in identifying overlooked talent. However, it also stresses the need for ethical considerations in AI's application[1].

NEED SOME TIPS WHERE TO START?

Then check out these plugins!

- **Web Search**

- **Market Intel**

- **Productivity**

- **Learning**

- **Automation**

RECOMMENDED PLUGINS

🌐 WEBPILOT
Web browsing option by providing smart answers based on your questions.

🔍 KEYMATE.AI
Search with Google and build an own knowledge base.

📊 VOXSCRIPT
Pulls information from various web sources, e.g. YouTube.

📄 ASK YOUR PDF
You can interact with any PDF (ask questions, summarize, analyze, etc.).

🤖 ZAPIER
It can communicate with other apps and manage automation.

📈 SHOW ME DIAGRAMS
You add the idea, it will ad flowcharts, mindmaps or charts.

💬 CHAT WITH YOUR DATA
Conversational analysis over your databases and spreadsheets.

📉 CHAT WITH EXCEL
Interact and analyze spreadsheet by chatting.

🎙️ LISTEN NOTES
Podcast search engine and database.

RECOMMENDED PLUGINS

🏬 **BRANDFETCH**

Retrieve company and brand data including logos, colors, fonts, and other brand information.

📊 **COMPANY ENRICHMENT**

Deliver comprehensive company information based on the given domain name.

📰 **OWLER**

Provide real-time business news and insights on private and public companies via Owler.

🌐 **GOLDEN**

Get current factual data on companies from the Golden knowledge graph.

💼 **OFFER ZEN WORLD**

Queries OfferZen's database for tech career, recruitment and pay insights.

✉️ **LETTER WRITER**

Create letters in different styles.

📝 **METAPHOR**

Deliver high-quality content from the web.

🛠️ **PUGINAI**

Recommend tools based on your earlier prompts.

🤖 **THERE'S AN AI FOR THAT**

It will find you AI tools based on your requests.
